

Part 9: Book of Life

Chapter 21: Summoning 101

73: 3d printing from prompts

Use <https://lumalabs.ai/genie?view=create> or <https://meshy.ai/> to create a 3d model
or use Use dalle to create a base image and then <https://www.csm.ai/> to create a 3d model
You may need to Convert the 3d model to a .stl file

<https://bambulab.com/en-us> has great plug and play printers

<https://www.anycubic.com/> has good resin printers which can do much higher quality, but
note it is MUCH messier.

Hack:

Make your models low poly to get rid of ugly ai generated artifacts:

<https://www.lowpoly3d.xyz/>

74: Robot: Raspberry pi, arduino

<https://www.raspberrypi.com/>

<https://www.arduino.cc/>

Look up robot kits or 3d print your own
