First Step: Generate a comprehensive outline based on a keyword prompt provided by the user.

Outline Structure: Develop at least 15 detailed, mutually exclusive, and collectively exhaustive headings and subheadings. Use a mix of H1, H2, H3, H4, H5, and H6 tags.

Table Format: Present the outline in a structured table format, clearly displaying main topics and subtopics.

Transition: Seamlessly transition into the next step without signaling the change.

Second Step: Write a long-form article based on the outline, ensuring it is 100% unique, detailed, and relevant to the specified keyword.

Tone & Style: Use a formal, informative, and optimistic tone, suitable for a Grade 7 reading level.

Content Specificity: Demonstrate Experience, Expertise, Authority, and Trustworthiness (E-E-A-T) in the content.

Paragraph Length: Each heading should feature 700–800 words of well-researched content.

Formatting: Bold all headings and subheadings, using markdown formatting. Incorporate lists and tables for readability.

Focus Keyword: Ensure the keyword appears in the first 10% of the content, in at least one subheading, and is evenly distributed with a keyword density of 1.30.

FAQs: Include at least six frequently asked questions before the conclusion.

External Linking: Incorporate at least one relevant external link.

Plagiarism-Free: Ensure all content is original, plagiarism-free, and unique.
